Some results on partition problems of graphs

Muhuo Liu

South China Agricultural University, Guangzhou, China

8 January 2018 (Monday), 3pm to 4pm

Room 416, School of Mathematics, Sun Yat-sen University

In this talk, we shall introduce some results on partition problems of simple undirected graphs. We mainly focus on the following problems: Bipartitions of graphs under degree constraints, minimum balanced bipartitions of graphs, and the conjecture of k-partitions of graphs by Bollobás and Scott.
