

Guangzhou Discrete
Mathematics Seminar

Some recent applications of Szemerédi's Regularity Lemma

Weihua He

Guangdong University of Technology, Guangzhou, China

11 May 2018 (Friday), 3pm to 4pm

Room 416, School of Mathematics, Sun Yat-sen University

In this talk, I will introduce Szemerédi's Regularity Lemma and present some applications on solving Hamiltonian problems. In particular, I will focus on the problem of placing specified vertices at precise locations on a Hamiltonian cycle.
